Aurora Works Co., Ltd.

Company Profile:

With more than 15 years' experience for engineering team, Aurora Works Co., Ltd. is a market leader in the following field;

- Supply Tank Protection Devices, Instrumentation & Valves.
- Support a wide range of industries from manufacturing to process control integrators.

Industrial Applications include:

- Power plant, Cogeneration Plants
- Petrochemical
- Chemical Processing
- Automotive Manufacturing
- Food and Beverage
- Cement Industries
- Oil & Gas; Crude and Product Tank Farms
- Refinery
- Pulp & Paper
- Water & Water Treatment
- Steel and Metal.
- Pharmaceutical
- A system integrator and Lump Sum Turn Key Project for Plant Automation System, Instrumentation process control system, SCADA /DCS, Fire & gas detection, etc.
- Service; Trouble Shooting, Calibration, Commissioning Start Up.
- Training Courses for latest technology to customer.

In addition, we support the expansion of industry in the Eastern Part of Thailand, we, Aurora Works Co., Ltd. have established Rayong Workshop Center to provide customer with fast, effective and efficient services.

OUR CUSTOMERS

KSPC / KOREA

TANK PROTECTION API 2000

Pressure / Vacuum Relief Valve

The Pressure / Vacuum Relief Valve is designed to protect low pressure storage tank from excessive pressure or vacuum created by thermal expansion [and contraction] and product movement into [out of] the tank and at the same time minimizing costly product evaporation / loss.

Flame Arrester

The most straight-forward protection device against Flame propagation is a Flame Arresters as country and local air quality regulation become more stringent.

Emergency Vent Covers

The Emergency Vent Valve and manhole cover open to greatly Increase the venting capacity of petroleum storage tanks when the internal pressure rises above the set point.

Rupture Disk & Explosion Panel & N2 Blanketing Valve

N2 Blanket gas controller helps gas pressure to maintain in constant state in the vapor space of storage Tanks.

Gauge Hatch & Slot Dipping Devices

The KSPC's Sampling and Gauging Hatch Cover are designed to provide quick access for product gauging, temperature measurement or sampling.

HIGH PRESSURE & TEMP For Power - plant

AQUARIAN 3000Visual Ported Bi-Color Gauge Glass

REMOTE DISPLAY
(CONTROL ROOM)

ELECTRONIC UNIT
TYPICALLY 5-12 PROBES
(UP TO 48 PROBES)

PROBE COLUMN

Aquarian 3000Visual Bi-Colour Water Level Gauge

The **Aquarian 3000Visual** is a 3000 psi ported gauge that produces a red/green image to indicate the water level in a high pressure steam drum. The body is precision machined into a trapezoidal shape. Light projected through steam produces a red image. Light projected through water is refracted (bent) and produces a green image. The gauge fulfills the requirements in the 2001 ASME Boiler and Pressure Vessel Code Section 1 PG-60.1.

Aquarian 3000Mini

The **Aquarian 3000Mini** represents the latest advancement in electronic water level detection for satisfying basic water level indication needs for boiler drums, feedwater heaters and other liquid level applications. The Aquarian 3000Mini is comprised of three major components: the water column with vacuum brazed water detection probes, the electronic Detection and Verification (D&V) unit and the remote LED display.

High Integrity Brazed Joint Probe

"Once And You're Done"

Building on the success of the Aquarian brazing technology, Fossil has developed replacement probes for Clark-Reliance™ models ZG, FG, V and T gasketed probes. This brazing technology is well proven with over 60,000 Aquarian probes in service worldwide.

PORTED GAUGE COMPONENTS

Pressure switches

Mobrey is a leader in the design and manufacture of robust, reliable and competitively priced compact, Industrial and high performance switches-internationally approved for use in hazardous areas for safety alarm and Shutdown applications.

Based on proven technology, switch products can operate at high and low pressures and are designed to satisfy site classification and all significant industry approvals.

Pressure transmitters

Mobrey analogue and digital pressure transmitters are repeatedly specified because of their compact size rugged design and high standard specification.

Mobrey pressure transmitter range includes absolute, differential and gauge designs, with analogue or digital outputs. High pressure and best in class accuracy can satisfy even the most demanding pressure applications over a wide temperature range.

Level & Control solutions

Mobrey™ Magnetic Horizontal Level Switches
For Liquid Level Alarm and Pump Control

You need to trust that your level switches won't let you down. Mobrey float level switches are rugged, robust, and trusted globally for their long term reliability in the harshest of environments and the most hazardous areas. Ideal for industrial applications such as pump control and high or low alarm duty on tanks and pressure vessels.

MSM400 ULTRASONIC SOLIDS
MONITORING AND CONTROL SYSTEM
VLS SERIES VIBRATING ROD SOLIDS LEVEL SWITCH

The vibrating rod level switch is the perfect solution for single point level switching in free flowing solids across a wide density range, from fine powders to grains. A single rod design provides the solution to tuning forks which may become blocked or bridged.

PLS SERIES PADDLE LEVEL SWITCH

The paddle switch may be used as either a high or low level limit switch. It is easily mounted through a vessel wall. A small electric motor drives a paddle which rotates freely in the absence of material.

BARTON FIRTOP / UK

STRAINER - PORTFOLIO

150-300LB Quick Release Basket

600LB Q/R Basket

Bolted Cover

Fabricated Basket

150-300LB Quick Release Basket

The **150-300LB Basket Strainer**, also known as Mono-in-line Strainer, is designed for the efficient removal of solid/foreign material from flowing liquids & gases.

Our **Quick Release** range of **Basket Strainers** are manufactured to **PED/97/23/EC** with end connections machined to recognized International Standards such as ASME B16.5.

Advantages of Basket Strainers over Y-Type Strainers

- Debris contained in basket
- Quick Release closure for easier maintenance
- Larger filtration area/Dirt holding capacity

Barton Firtop's Basket Strainers offer a **LARGER** filtration area than similar strainers on the market, ensuring minimal pressure loss, improved flow-rates & greater dirt holding capacity, leading to longer service/ maintenance intervals.

Conical Strainers

Socket Weld Y-Type

Supplied in Red Oxide Primer as Standard

Flanged Y-Type

Duplex 'Firplex' Strainer

TECHNICAL / ITALY

SAFETY VALVE SOLUTION

30000 SERIES

Safety valves 30000 Series: suitable for vapours, gases and liquids. These are full nozzle, full lift and spring-loaded valves compliant with API 526 standard, certified under PED, ASME VIII Div.1 and EAC.

30000P HIGH EFFICIENCY

High Efficiency Pilot operated safety valve: suitable for vapours, gases and liquids. They can operate with high back pressure values and can grant tightness in accordance with API 527 up to 95% of set pressure. Pilot is equipped with a blowdown adjustment device.

20000 SERIES

Safety valves 20000 Series: available with threaded or flanged connections up to 1", suitable for vapours, gases and or liquids with set pressure up to 1500 bar. These valves are both PED and EAC certified for all fluids and certified under ASME VIII Div. 1 for gases and vapours device.

10000 SERIES

Safety valves 10000 Series: available with threaded or flanged connections up to 2", suitable for vapours, gases and liquids. These valves are both PED and EAC certified for all fluids and certified under ASME VIII Div. 1 for gases and vapours.

4000 SERIES

Relief valves 4000 Series: available with threaded or flanged connections up to 2", suitable for liquid fluids. They are especially recommended for the protection of dosing/metering pumps. These valves are both PED and EAC certified.

SV 5001 SERIES

Safety valves SV 5001 Series: available with 1/2" threaded connections, suitable for vapours, gases and liquids and for protection of low flow rate pumps. These valves are PED certified.

SV 10001 SERIES

The safety valves series SV 10001 are made of stainless steel SS 316L and of superalloys. Connections 1/4", the adjustable outlet connection.

Thermocouples

EPIC® SENSORS thermocouple sensor produces a mV measuring signal, which is proportional to temperature depending on which TC type is used.

The sensor is a standard-type RTD or TC temperature sensor (no ATEX/IECEX requirements)

The connection hood is a standard-type, IP 65-protected hood, with a protective earth connection screw (no ATEX/IECEX requirements)

The whole circuit must be designed as an intrinsically safe Ex i circuit (cable length, ATEX/IECEX transmitters, ATEX/IECEX barriers).

Amazing Long-Range Signal

LoRa transmission technology has a 15 km range outdoors, and the signal also transmits well indoors and even below ground. Being highly tolerant of interference, it suits demanding environments

Stock items of compensating cables

Thermocouple sensors must be wired with right kind of materials between hot and cold junctions, in order to avoid measurement deviation caused by thermo voltages in connections of different materials. Cable types used are extension wires (X) or compensating cables (C).

MOTOR & HEATER & FILTER

Electric air heaters

The heating coils with integrated electrical heating elements, flange frame or fixing plate as well as casing for electrical connections are laid out and assembled according to the customer's specifications and operating manual.

Materials are made of steel or stainless steel according to customer's instructions.

A higher thermal efficiency is attained using a specific surface load (pa), which is optimally adjusted to the operating conditions.

Air blower heaters

Explosion protected air heaters are used for warming the air space in explosion hazardous areas, e.g. in the petrochemical, chemical and pharmaceutical industries, crude oil and natural gas production, in paint and varnish industry storage spaces as well as for general use in fire hazardous production facilities.

A heating coil and ventilator both of explosion proof design are installed in a duct shaped housing.

Immersion heaters

Immersion heaters serve for heating of fluids, air or gas. They are components of machinery and plants, or mounted into tanks or vessels.

According to the individual requirements of our customers, ELMESS-Thermosystemtechnik is offering customised immersion heaters.

They are designed and manufactured in high quality industrial design or in explosion proof design according ATEX. This guarantees a maximum of reliability, safety and long lifetime for your plants.

MAX MÜLLER AG / SWITZERLAND

Process illumination and visual observation systems

Stainless light fitting for hazardous areas

These two series of classical, yet innovatively developed and uniquely powerful light fittings for use in hazardous areas have laid the base for MAX MUELLER's success in this field. Their robust design, the variety of fixation modes and the important range of options make them a sophisticated tool to light out all kind of process equipment, even for very demanding applications. The 100 deH type with 100 W power is actually the most powerful halogen type vessel light fitting classified in T4 available on the market.

Stainless steel sightglass light fitting for safe areas

- Universal use on different sightglass types due to very small dimensions
- Ideal for application, sight and light through one sightglass
- Power from 2 to 100 W, supply voltages from 12 up to 240 V
- Halogen or LED version

Half-light fittings for safe areas

- For application, sight and light through one sightglass''
- Power from 2 to 100 W, supply voltages 12 and 24 V
- Halogen or LED version
- For use with momentary push button, ON-OFF''-switch as well as For continuous operation (depending on type and power)
- From stainless steel for sightglasses similar to DIN 11851 (series HLMR)

MANWAYS

Reflex Liquid Level Gauge

Simco Reflex liquid level gauges are designed to operate based on the difference in the refractive indices of liquid and vapour. The liquid flows through the gauge chamber behind the viewing glass located on only one side of the instrument and which is clamped to the gauge body. The viewing glass is made from toughened borosilicate glass and has prismatic right-angled grooves on the side facing the liquid and vapour space.

Magnetic Liquid Level Gauge

Magnetic liquid level gauges can be used for measuring either total or interface level and offer an alternative solution to traditional reflex / transparent gauges. Accessories such as switches / transmitters can be supplied and fitted to this type of gauge and it is not necessary to have isolation valves as there is no glass to break.

Reflex & Transparent Gauges

Simco Reflex liquid level gauges are designed to operate based on the difference in the refractive indices of liquid and vapour. The liquid flows through the gauge chamber behind the viewing glass located on only one side of the instrument and which is clamped to the gauge body. The viewing glass is made from toughened borosilicate glass and has prismatic right-angled grooves on the side facing the liquid and vapour space.

Isolation Valves

Simco isolation valves have been specifically designed for use with liquid level gauges and are available in a variety of materials suitable for temperature and pressure ranges to meet most specifications. Valves are available in both straight and offset pattern designs and have a selection of vessel and gauge connections to fit a variety of mounting requirements.

Electrical Heating Systems

Heating up Gases and Vapours

Heating gases with a heater is a complex task. High temperatures must often be regulated while main-taining a high operating pressure. Heaters from Klöpper- -Therm meet these requirements by an appli-cation-oriented dimensional design.

Heating up Liquids

Liquids stand for high heating capacities and good thermal conductivity. They have low requirements in terms of operating temperature and pressure. Our expert knowledge is nonetheless required to prevent the medium from thermally disintegrating or vapori-sing caused by overheating (cracking).

Heating Mat System / Heating System and Control

Cold storages and cooling chambers use a range of heating systems depending on the design. Klöpper-Therm offers sophisticated solutions for the most varied requirements.

GSI/ USA

TANK GAUGING SOLUTION

Gauging Systems Inc. (GSI) manufactures: Flood Gauges, Target Boards, Sump Gauges, Level Indicators, Tank Gauges, Mechanical Float & Tape Gauges, Multi-function Tank Gauge, Digital Transmitters, Analog Transmitters, Limit Switches, RTU's, LPG Tank Gauges, Communication Interfaces, Solar Interfaces, Instrument Shelters, High Level Alarm Switch, Overfill and Rupture Prevention, Unauthorized Movement Alarms (Leak Detection, Theft, Improper Line-ups, Equipment failure, etc.), Drop Box Notification Systems, and more.

2000 ABSOLUTE DIGITAL TRANSMITTER

The GSI-2000 Absolute Digital Transmitter provides transmission of mechanical tank gauge data and I/O from tank side to a communication interface or host system.

2550 MAGNETIC LEVEL GAUGE

The 2550 Magnetic Level Gauge provides local indication for level measurement. This tank gauge's internal components are totally isolated from the product of the tank within a sealed tube.

2570 MECHANICAL TANK GAUGE

The GSI 2570 Mechanical Tank Gauge is a mechanically actuated, float and tape instrument designed to provide continuous level measurement in tanks, vessels, vats, or any other container for liquid storage. Also referred to as Automatic Tank Gauge (ATG), Float and Tape Tank Gauge, Float Type Level Gauge.

2400 ANALOG TRANSMITTER

The GSI 2400 Analog Transmitter is a current output (4-20 mA) transmitter that converts level measurement from a standard mechanical tank gauge.

MTG MULTI-FUNCTION TANK GAUGE

The MTG Multi-function Tank Gauge provides more information for Loss Control, Safety, Environmental, and Operations than any other tank gauge system ever developed. It provides and exceeds data needed to meet a host of API Recommended Procedures or Standards for Overfill Protection, Rupture Monitoring (Over pressure & Vacuum), Product Quality (Sampling), Vapor Emissions Monitoring, Leak Detection, Product Stratification Monitoring for In-Tank Blending, Water Settling (Bleeding), etc. thus assuring payback on your investment.

First Established as Aurora Works co., ltd. In the Business of sale and service to Industrial products and consultants

About Us

Aurora Works Co., Ltd. was established in 2008 with more than 10 years' experience in petrochemical oil & gas, Power plant, cement plant, pulp & paper in Thailand markets.

With representative & distribution, and services of instrumentation, electrical, mechanical c/w valves solution, Such as; Tank protection device, Water level detection products, Flow, Temperature, Pressure, Control Valve and cover engineering service.

Mission

Be recognized as the leading supplier in delivering smarter of Tank protection devices & instrumentation and solutions.

Aurora Works is the exclusive distributor for K.S.P.C. (Korea), Fossil (Canada), Klopper (Germany), EPIC-SKS (Finland), Elmess (Germany), Barton Firtop (UK), Delta Mobrey (UK), Simco (UK), Technical (Italy), and MAX MÜLLER (Switzerland).

Vision

To deliver superior customer services and solutions to our customers effectively and efficiently.

 (Sales Director)

Dear Sir,

Subject: PRODUCT REPRESENTATION IN THAILAND

We, TECHNICAL, S.L. hereby confirm that your company, AURORA WORKS has been appointed as our EXCLUSIVE AGENT especially in Oil & Gas Market in the territory of THAILAND for our products as follows:

With immediate effect MUS MACROSPICEN BFG shall represent our company for the below products:

**MUS Copressed Safety Relief Valve (SRV) 30000
 Conventional Safety Relief Valve (SRV) 25000, 50000, 4000, 10000, 20000, 30000
 Beyond Below Safety Relief Valve
 All other PRODUCTS, part of the TECHNICAL product range**

This appointment is within the terms of the Sales Agreement entered on 02nd November 2016 and is valid up to 31st DECEMBER 2017 and must be renewed in writing (3) months before expiration.

Thank you.

Yours Sincerely,

AGENCY AGREEMENT

The following Agency Agreement is concluded between Messrs. ELMESS, Thermosystemtechnik GmbH & Co. KG, Nordallee 1, 29825 Uelzen, Germany (hereinafter called "ELMESS") and Aurora Works Co. Ltd. with head office at 888/850 Pachaubhai Rd., Pachaubhai Road, Thung Khroi, Bangkok 10140 (hereinafter called "AURORA") on a non-exclusive basis:

1) ELMESS appoints AURORA as an independent business with the task of obtaining sales for the complete ELMESS sales programme.

2) The local area of activities comprises Thailand.

3) Initially, this agreement is limited until 31.12.2016. The agreement commences with the date of signature of ELMESS. It can be cancelled before expiry of this agreement by 1 month notice up to the end of a quarter.

Notice to be given in writing by registered letter. In case that the sending by registered mail is not possible, another means of transmission will also be considered as sufficient.

Regardless of this regulation, each contract partner is allowed to terminate this contract in advance or with immediate effect due to significant reasons, e.g. insolvency or bankruptcy, infringement of contractual or legal agreements, change of proprietors or change of the management.

If one of the partners of this agreement gives notice, then all samples, exhibits, brochures and other items in ELMESS's possession must be handed over to them on expiry of the agreement.

In case of termination or expiry of this agency agreement all ongoing orders shall be handled as scheduled and compensation shall be paid according to the regulations of this agreement.

Any further compensation is excluded.

4) AURORA carries the obligation to operate actively in the a. m. sales area and to support ELMESS in all respects, especially in obtaining official and other authorisations. For qualifications and registration in client's vendor list, enquiry letters and purchase orders. All business activities, AURORA has to respect all laws and regulations locally valid.

AURORA will inform ELMESS immediately about any business conclusion and will support ELMESS in obtaining details of the financial status of the customer. ELMESS is obliged to confirm the acceptance of an order transmitted by AURORA immediately. This agreement does not give AURORA the right to oblige ELMESS of accepting any order. The partners of the contract agree that a claim for commission only exists for orders accepted and executed by ELMESS.

Court of jurisdiction for all disputes arising from this agreement shall be Zurich, Switzerland.
